Double Billing

I. Chronology

-
- 12/5/96 - AIT notified that retail unit still had visibility to end-user acct after completion notice sent to MCI on 12/2. AIT knew order errored out in billing process due to system bug.
- 12/19/96 - Test orders finally make it through AIT billing system. AIT tables improperly updated. Took 2 weeks to find error and fully correct.
- 2/6/97 - MCI brings up the issue of possible double billing due to orders erroring out in billing system. AIT confirms that this could happen.
- 4/26/97 - Reporting requirements submitted to AIT to help MCI monitor the situation. Still no response or reports.
- 5/13/97 - Letter sent to MCI outlining action plan to help double billing issue (5 1/2 months after problem first identified, 3 months after repercussions of issue identified)

II. Examples

TN - Telephone Number

COMP - Completion Date sent to MCI

BILL - Date Order is updated to AIT's Billing system

	TN	NAME	COMP	BILL
1)	616 245-3341	Judy DeYoung	2/20	5/22
2	414 258-7220		3/5	4/13

	TN	NAME	ORDER #	COMP. DATE	BILL DATE
3)	847 266-1929	Christopher Plowman	C0675010307	3/5/97	5/19/97
4)	847 998-9603	M. N. Herrmann	C0675010189	2/25/97	4/25/97
5)	773 268-0555	Betty Turner	C0675010257	3/3/97	5/22/97
6)	847 549-8418	Manuel Ballestero	C0675010190	2/25/97	4/7/97
7)	815 626-2743	Max Johnson	C0675010191	2/24/97	5/1/97
8)	815 477-0801	Peter Priepke	C0735000326	3/7/97	5/22/97
	815 477-7607	Peter Priepke			

	NAME	TN	BILLS RECEIVED
9)	Robinson, Wayne	216-238-1811	2-28 March/April (dir. debit)

	216-572-5989	2-28	March/April

20) Joy Howard	216-397-0650	2-28 March, April

III. Inadequacies of AIT action plan To Address Double Billing

- Still highly manual. Reps need to go in and manually update customer acct.
- Does not address when large volumes of orders error out due to a system bug. MCI has encountered 2 system bugs (that we know about) that has caused our orders to error out. System bugs take much longer to fix and could delay the processing of orders for many days to weeks. It took AIT 2 1/2 months to identify and correct the last system bug in AIIS that caused most of MCI orders to error out in billing system.
- Does not address the issue of AIT retail marketing to MCI customers while the order is in an error status in billing system (3E status).
- It does not address the fact that customer usage will be delayed until the error is cleared from 3E status. This could cause MCI to have to back bill customers for delayed usage.
- AIT has not yet provided any reporting to MCI to help monitor the situation. We do not know how many of our orders error out.

**MCI Telecommunications
Corporation**

April 24, 1997

**Mr. Ted Edwards
Vice President of Sales
Ameritech Industry Information Services
350 North Orleans Street, 3rd Floor
Chicago, IL 60654**

Dear Ted,

As you are aware, MCIIm started offering its resale service in Illinois this past Monday 4/21/97. We acknowledge your commitment to work together to resolve OSS issues/problems, and urgently need your assistance to resolve one that has not been addressed adequately.

Since last December, MCIIm has been trying to overcome an Ameritech process error that has caused an array of problems including (1) MCIIm customers being double billed (by MCIIm and AIT for the same period); (2) MCIIm resold customers remaining visible to AIT's retail services employees; (3) customer daily usage data not being sent to MCIIm; and (4) post-sale CSRs not available to MCIIm's customer service representatives. This issue has been raised on numerous occasions by Ali Miller during joint MCI/AIIS weekly conference calls, and most recently, by Ann Peterson who worked with AIIS's Mike Murray on several system problems uncovered during the beta testing.

In essence, the current Ameritech system process allows an order to be completed in the ordering system but then (due to current and future unknown errors) drops the order out of the system before it completes (out) in billing. As a result, all of the aforementioned problems arise and are unacceptable. I am requesting that you take the necessary steps required to develop a process to resolve this issue. The process developed should provide a complete notification to MCIIm with absolute certainty that a resold customer has been migrated in both the ordering and billing systems.

I understand that some of the individual errors causing these problems have been identified and fixed, leading us each time to believe the problem has finally been resolved. However, it has become apparent that these fixes are only addressing the symptoms while the root cause (premature completion notification) remains unaddressed. Your investigation and proposed Plan of Action to comprehensively resolve this problem is needed.

Please contact me directly at 312-470-4633 if you have any questions. Questions of a technical nature regarding this issue should be directed to Ali Miller at 303-291-6337, but please do not hesitate to get me involved, as required.

Sincerely,

A handwritten signature in black ink, appearing to read "Dick", with a long horizontal flourish extending to the right.

Dick Powell
Director

out we will still be vulnerable to double billing.

have asked Ameritech to provide us reporting on the number of our orders that
for out on their billing process so that we can get a feel for the magnitude
of this problem. If we have the appropriate reporting, we can monitor the
situation and not wait for customers calling in complaining before we know there
is another problem. We will have to keep on top of them to get these reports.

Ameritech has asked that we try this process for a while to see if it works. If
it does not work, they will look at other options.

If anyone has any questions, please feel free to give me a call.

Ali

Ms. Ali Miller
707 17TH Street
Denver, CO 80202

Dear Ali,

This letter is intended to provide additional details on the action
plans Ameritech has developed to address billing issues. We
recognize that there have been situations where service orders, that
have errored in our legacy billing system, resulted in Ameritech
bills being sent to end users after the account has migrated to MCI.

Our overall goal is to improve the accuracy of all service orders
being processed. In order to achieve this goal, we have initiated
additional training for our service representatives as we identify
practices that generate these fallout conditions. We have also
implemented new edits in our mechanized processes that will increase
accuracy and ensure that those orders which "flow through" are also
without error.

We believe that there will always be a small percentage of orders

which error. To that end, we have dedicated resources whose primary responsibility is the monitoring and resolution of error conditions as soon as they are identified.

Our plan to address the end user impacts involves several steps: First, we are putting a process in place to hold all bills from being mailed whenever an order is in an error condition. Our service center will receive those bills and hold them until the error condition is resolved. They will then be responsible to see that the appropriate credits have been applied in advance of mailing the final bill to the customer. This mailing will include a letter explaining the final bill.

Second, whenever we identify an order which is in error, we will mark the customer record such that the Ameritech Retail unit can recognize the situation. They will then be better prepared to answer questions regarding Ameritech billing.

Finally, we will flag these accounts in order to prevent any collections activity from occurring. This will eliminate any concern that end users may be disconnected for non-payment.

We have targeted the week of May 12 for implementation of these measures. Once fully implemented, we will complete an analysis of those service orders completed to date. With this analysis in hand, we will be able to work with you to address any adjustment concerns that you may have. A complete list of the accounts that you feel were wrongly billed by Ameritech will be required in order to complete this investigation.

I believe that the process described here will address the billing issues to your satisfaction. Please feel free to direct questions or comments on this issue to me at (312) 335-7340 or to Dora Ross at (312) 335-6547.

Michael Murray
Service Manager

Mike,

As we discussed earlier, I still have concerns with the manual nature of this process. This is definitely an improvement over the current process but I am still not convinced that double billing will be completely eliminated. This may be completely adequate to fix orders that are due to rep errors, but what happens when there is a system bug that causes large volumes of orders to error out as we just experienced? Because this is manual, we will not be much better off than we are today.

We can definitely monitor the situation for a while to see if this will be adequate. To do this, though, we will need reporting on the number of orders that error out in your billing process. We would need the number of MCI orders and their PONS and perhaps the total number of orders for all CLECs that error out.

I imagine some of the reporting rqts that I sent to you earlier would still apply.

Thank you for responding to our concerns and we will wait to hear from you about the reporting requirements.

All,

Below is the letter Ameritech just sent explaining exactly what they plan to do. It is pretty much what I said in my note yesterday.

Basically, it is better than what they are doing today, but it is still not the final solution. We are still vulnerable to double billing because this is all a manual process.

If the number of orders that error out are minimal, the process described should work reasonably well. If we run into an instance like we did before where there is a system bug (as opposed to rep errors) and a majority of our orders error

out, we will still be vulnerable to double billing.

We have asked Ameritech to provide us reporting on the number of our orders that error out in their billing process so that we can get a feel for the magnitude of this problem. If we have the appropriate reporting, we can monitor the situation and not wait for customers calling in complaining before we know there is another problem. We will have to keep on top of them to get these reports.

Ameritech has asked that we try this process for a while to see if it works. If it does not work, they will look at other options.

If anyone has any questions, please feel free to give me a call.

Ali

Subject: USOC & Billing review sessions

Dora,

I have two requests.

1. Can you set up a meeting with your billing folks so that we can walk through the AIT bill. If you got my fax, you can see that the bill has ALOT of mistakes. It would good if we could walk through line by line to understand the charges. Early next week would be good.

2. I would also like to have a review of the USOC codes. We would like to confirm that the usocs we are using are the correct ones for what we think we are ordering. Many times, the descriptions on the web search and the USOC pocket guide do not match the descriptions in the tariff and so we are not sure if we are ordering the right thing. We are also having difficulties finding some of the USOC codes for various products. Towards the end of next week would be good. That will give us enough time to document our questions and forward to you beforehand.

Ali

Subject: USOC meeting summary

All,

Here are the minutes from the 2/6 USOC meeting.

Ameritech Action Items - DUE 2/10

o Determine FID or USOC for the following items:

- + Pic Freeze
- + Special Delivery
- + Various flavors of call packs (100, 250, 400)
- + How do we specify the temporary intercept message (two flavors)
 - "The # you have reached is not in service for incoming calls
 - "The # you have reached is temporarily disconnected calls are being taken by _____
- + Digital Trunk - Combination
- + Analog DID Trunk with Call Transfer

- o AIT will provide MCI will the list of USOC codes for all the paths of Remote Call Forwarding
- o AIT and MCI will further discuss the possibility of additional training for MCI for the more complicated products that were discussed at very high level during the initial training.
- o AIT will confirm which USOC is appropriate to order Res and Bus measured rate. The ordering guide indicates 1B8 and RWN. Chuck O. thought it was 1MR and 1MB

- o AIT validated that the following USOCs were indeed correct.

Validate the following USOCs are correct

Call Waiting	ESX
Call Screening	NSY
3 Way Calling	ESC
Speed Calling 8 Number List	ESL
Speed Calling 30 Number List	ESF
Call Forwarding (Variable)	ESM

Analog Trunk - Outbound	TF80X
Analog Trunk - Combination	TF8
Analog DID Trunk	TKJCX
Digital Interface	TZP

Various other USOC questions

1. What is the difference between these USOCs?

Res Measured Rate 1MR &
IL Residence One party measured RWN

Business Measured Rate 1MB &
IL Business mea 1B8

Follow up required. One usoc indicates in service quantity, the other deals with usage.

2. Do we have to put this on the order or do they automatically come on the line?

End-User Common Line Single Line 9LM

This automatically comes on the line. Do not need to order. Should probably order touch tone.

3. Are there other common USOCs that we would have to order for the line besides the RWN or the 1B8?

Don't think so.

4. What is the difference between a FID and a USOC?

Generally FIDs are used to further define a USOC. You can have a FID without a USOC and a USOC without a FID or a USOC with a FID.

5. To order a pid number, do we put PID after the feature and then specify the pid number that we want?

Operational question, AIT did not have an answer.
